Wood county forest products and processing industrial output is 28.5% of the total county industrial output. These forest related industries employ 11.1% of the total employment in the county. For every 10 statewide jobs in the forest related industries an additional 19 jobs are produced in other sectors of the state's economy as a result of forest industry purchases and their employee's household purchases. By comparison, for every 10 jobs in the service industry only 8 jobs are produced in other economic sectors.
